

# COUNCIL FEES AND CHARGES

Fees and charges are determined by Lake Macquarie City Council each year and contribute towards helping us provide services and facilities for our City.

Our fees and charges are intended to cover:

- the supply of a product, service, or commodity;
- the giving of information;
- providing a service in connection with the Council's regulatory functions, including receiving an application for approval, granting an approval, making an inspection and issuing a certificate; and
- allowing admission to any building or enclosure.

In accordance with *Section 608 of the Local Government Act 1993* and other relevant legislation, Council levies a range of fees and charges as contained within this document.

When Council determines its fees for goods and services, it takes into account the following factors:

- the cost of providing the service;
- the importance of the service to the community;
- prices fixed by relevant industry bodies;
- any factors specified in the Local Government regulations;
- equity factors;
- user pays principle;
- financial objectives;
- customer objectives;
- resource use objectives; and
- cross-subsidisation objectives.

Council reviews all fees and charges, not subject to statutory control, on an annual basis, prior to finalisation of Council's annual operating budget.

The predominant consideration in reviewing those fees and charges is full cost recovery on a fee for service (user pays) basis. However, this principle only applies where the cost of the service provision and the end users can be accurately determined.

The following table outlines the various methods of pricing which Council has implemented. Those pricing methods range from partial cost recovery through to the recovery of an amount greater than the full cost of providing the service.

Fee increase percentages may be greater than the Consumer Price Index (CPI) due to a number of factors including:

- rounding;
- the practice of reviewing fees biennially versus annually; and/or
- benchmarking of services/fees against other councils.

# PRICING PRINCIPLES

Code	Pricing basis	Pricing principle includes
1	Partial cost recovery	(a) the benefits from provision of the service accrue to the community as a whole as well as individual users; (b) charging prices to recover full cost may result in widespread evasion; (c) the service is targeted to low income users or a differential service fee is charged according to the classification of users to maximise access to the service; and/or (d) the service promotes or encourages local economic activity.
2	Full cost recovery	(a) the service benefits particular users, making a contribution to their individual income, welfare or profits or a private benefit being provided without any broader benefits to the community; and (b) Council has a monopoly over the provision of the service and there are no community service or equity obligations. The fee or charge is calculated on the full recovery of annual and maintenance costs, on-costs and overheads. This would also include any debt servicing costs associated with the provision of the service.
3	Market competitive	(a) the service provided is in competition with that provided by another Council or agency (private or public) and there is pressure to set a price which will attract adequate usage of the service; and/or (b) the service is a profit making activity and the price paid by users should recover an amount greater than the full cost of providing that service.
4	Statutory	(a) the service is a regulatory or statutory service and where the fee is determined by Council in accordance with a pricing principle prescribed in regulations (eg a maximum price). (b) the amount of the fee is prescribed in regulations or determined by the Director General of the Department of Local Government or another authorised authority. Council has no discretion to determine the amount of the fee for a service when the amount is fixed by regulation or by another authority.
5	Demand management	The fee or charge is determined at a level greater than the direct cost of the service to provide a disincentive, or to recognise indirect costs associated with the provision of the service.
6	No charge	The service is provided at no charge or has been specifically excluded from any cost recovery.

*Note: The attached schedule identifies those goods and services subject to the Goods and Services Tax (GST). The fees/charges shown for those goods and services are inclusive of GST.*

Credit card surcharge is levied where customers pay for Council services with a credit card. The credit card fee is inclusive of GST, if the underlying Council service being paid for also attracts GST, otherwise GST is not charged on the credit card fee.

Council's financial institution may charge an online booking transaction fee which is in addition to the fee amount displayed by Council and is outside of Council's control.
